The first sand and mud lot playgrounds, which provided space for neighborhood children a few years ago, is about over in Florida. Realizing that through play and recreation and organized play physical health and character of youth are molded and built, the nation, state and county have placed increasing emphasis on supervised playground programs in recent years.

In the days of sand and mud lot supremacy, children played according to their own rules and dictated and had little guidance in principles of fair play. Here Paradise Park has become the glorified lot and Mrs. C. W. McDonald and her directors guide the children of the community in safe and healthful recreation.

In the beautiful lawn park setting, a healthy portion of the 357 preschool and school children participating in the program enjoyed a picnic supper Saturday night which marked the end of the annual summer recreation program. The program for school age children was under the direction of Mrs. Doug Leavitt and Assistant Coach Charles Hall sponsored by the Department of Education. The program for the preschool group is directed by Mrs. McDonald.

It's hard to judge the extent of progress of this community recreational center over recreational facilities of the country. Serving as a yard stick are the words of Jack Smith, director of the school recreation program. He has stated several times that Paradise Park is one of the most beautiful and well planned recreation areas in the country and one of the best supervised.

Last year the summer program took top honor in the country.

It's a comfortable feeling to know that the children of the town have such a beautiful well equipped place in which to play and to know that this community, though small, ranks tops in recreational provisions.

CRUSADE FOR FREEDOM

On Labor Day, last year, under the chairmanship of General Lucius D. Clay, the first CRUSADE FOR FREEDOM was launched. In a brief two weeks, 16 million Americans joined the CRUSADE. Contributions of one and one third million dollars made possible the new, powerful Read Free From Freedom station in Munich, Germany. This station, hour by hour, day by day, steadily undermines the influences of Communism. And it was the work of America informed and aroused, who brought this about.

The 1951 CRUSADE opens September 3rd. Its avowed objective is to extend and strengthen this reaching out to, and talking to, the oppressed might.

COUNTY EXCEEDS QUOTA IN FLOOD DRIVE FUND

The county went well over the local goal in the County Red Cross Drive to help relieve the Kansas City flood area, according to Mrs. Guenney Curran, Jr., chairman of public information.

"But since the flood waters have receded, the damage has been found to be far greater than was anticipated and the original estimate of \$5,000,000 for rehabilitation and relief has been increased to \$6,500,000," Mrs. Curran stated.

She said that even though the drive has ended those wishing to help may still send their checks to the Palm Beach County Red Cross Chapter.

Mrs. Jack Hollingsworth entertained at her home recently in compliment to her daughter, Vicki Sue, who celebrated her sixth birthday.

Just think, if you and every other public-minded citizen get behind this CRUSADE, there is simply no limit to what can be accomplished. It might just might be the one added element that would surely, definitely tip the scales to peace. We urge you now to back the CRUSADE FOR FREEDOM with all your might.

Ever thrill to the sight of a sabre-winged jet fighter—outdoing the sound of its own engine as it knives through the summer sky?

Whenever you see this exciting—and reassuring—spectacle, remember the crew chief you see here, crouching in the engine compartment of a F-86. Remember that it's a man like him, with their patient training and tooling, their superb intelligence and skill, who keep those jets in the air. Hornet-ready at an instant's notice to protect your family and you.

Remember also that defense is your job, too. And one of the most important ways you can do that job is to buy U. S. Defense Bonds. For your bonds help keep America strong economically, just as the Air Force helps keep a strong militarily. And it's a combined strength that protects your town, your home, your right to work and play in peace. For your security, and your country's too, buy these Bonds regularly—through the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank.

The U. S. Defense Bonds you buy give you personal financial independence. Remember that when you're buying Defense Bonds you're building a personal reserve of cash savings. Money that will help you a house or education for your children, or support you when you retire. Remember, too, that you don't save regularly—most people don't. So go to your company's payroll savings plan—and sign up for the Payroll Savings Plan.

Don't forget that bonds are now a better buy than ever. Because now every E bond you buy is worth more. Every E Bond you own automatically earns interest every year for 20 years from the date you buy it instead of 10 as before. This means that the bond you bought for \$18.75 can now be worth not just \$25—but as much as \$33.33! A \$37.50 bond pays as much as \$56.66. And so on. For your security and your country's, too, buy U. S. Defense Bonds now!

The U. S. Government does not pay for this advertising. The Treasury Department thanks, for their patriotic donation, the Advertising Council and

GEORGE YOUNG RELEASED FROM HOSPITAL MONDAY

George C. Young, manager of the Gladys Livestock Market, was released from the Belle Glade Memorial Hospital Monday where he was treated for a broken leg suffered in a motor accident.

Mrs. Young is helping with work at the market and the two of them have worked out the financial arrangement.

Once again George Young, at the market by phone, ran also to George although he was at home. He's a pretty neat organization, but Mrs. Young admits it has some draw backs. She can't say a word that hardly doesn't bear.

The money contributed by citizens joining the CRUSADE FOR FREEDOM will go toward the expansion of Radio Europe, a network of radio stations in daily operation reaching the hearts of the people in the "captive" countries.

PRISON BUSINESS OFFICE BUILDING NEARS COMPLETION THIS WEEK

The most recent project in the Gladys State Prison Farm's long range building program, the new office building, was nearly completed this week according to James C. Baldwin, business manager.

The two-story brick, two-story building will include the superintendent's and business manager's offices, a reception room, the telephone exchange, the post office and a storage room. The building is located in front of the main prison structure outside of the surrounding fence. The business offices have been housed in the old temporary wooden structure, Baldwin said.

The air-cooled building should be entirely completed in a couple weeks, he said.

For the past two weeks the water department staff has been overhauling plant machinery and equipment in preparation for the season, Throop reported.

Although there has been no proven cause for the outbreak of cases here, the animal husbandmen said that it might be brought on by the animal feeding on an summer Alexander grass. They explain that the plant contains a toxic element known as methylbromide and that Alexander grass tends to absorb it from the soil more than a man's diet sometimes necessary to counteract this toxic element, they stated.

Commercial Seining To Stop In Lake Okeechobee

All commercial fresh-water seining operations in the State of Florida will be discontinued effective Sunday, Ben L. McLawhorn, director of the Game and Fresh Water Fish Commission, announced last week.

A number of seines have been operating on the St. Johns River and Lake Okeechobee under permit for the taking of fish, he said.

McLawhorn stated that with suspension of commercial seining, the Commission would anticipate stepping up its own fish control seining operations to assist Commission employees and Commission owned or leased equipment. Commercial fishermen of good character and with clean records will be considered by the Commission for employment with the Commission, he said.

In explanation of his order, McLawhorn stated that com-

mercial seining operations previously undertaken have not justified the cost involved. "Over a period of approximately four weeks, with wildlife officers on duty with each seine, the time it took to haul deck until it was time to process the new M-134 truck.

The new model is bigger, faster, lower, easier to drive, easier to maintain and able to carry heavier loads than its historic predecessor of the last 10 years. The new GMC "Army Workhorse" of which more than one-half million rolled from the GMC Truck factory.

Powered by a GMC 6-cylinder (302 cu. in.) engine, the new model has a maximum fuel (meaning six wheels, all six power driven) hits a maximum speed of 58 miles per hour carrying a 10,000-pound load. It is equipped with "snorkel" which permits driving through water on deep dredging operations. While GMC's World War II model could be adapted to operate submerged, the new model has such sealing features built in.

VETERANS INFORMATION AND SERVICE

AGRICULTURE DIVISION FORMED IN STATE CIVIL DEFENSE ORGANIZATION

Federal grants for "wheel chair" houses have been established by nearly 3,600 seriously disabled veterans. The Florida Department of Veterans' Affairs has assisted many of these veterans to establish their rights to the grants.

The grants were authorized by an Act first passed by Congress in 1948 and later amended, under which Veterans' Administration will pay 50 percent of the cost of such homes for eligible veterans.

Originally, only paralyzed veterans, by the amendment, may make all eligible veterans war or peace-time service since 1898, whose service-connected disabilities result in the loss of the use of both legs.

VA is changing the law, aiming that the applicant's disability is one within the scope of the law, that it is medically feasible for the veteran to live in the home, that the property income to the particular home selected is adapted to his needs.

The homes intended to be built are to be ramps, instead of steps, designed large enough to accommodate a wheelchair, special bathroom fixtures, and exercise rooms equipped in accordance with the needs of the veterans.

Model plans, specifications and blueprints of such specially designed homes, which the veterans may use if he wishes, will be supplied by the VA. The ramps will be utilized in several ways. The veteran may buy a lot and build on to suit his needs, or apply the

Forbes Magazine has been digging in an effort to discover how our tax money is being spent by government bureaucrats to whom it is turned over. Their findings are extremely interesting.

One of the most curious for waste seems to have hit the Army on the purchase of can openers. The Army has just purchased sixty-eight mil-

lion can openers for the use of one and a half million men. One can opener costs nine cents to the Army, around a cent to a citizen taxpayer. I have no objection to providing everyone from the Commander-in-Chief down to the smallest rear rank rookie with one at government expense, but when it comes to can openers, even men with 42 can openers, it looks to me like somebody is being overgenerous, enthusiastic or something.

able information I've been able to get, metal is scarce. All over the country boy scouts are urged to salvage all kinds of metal. If the purpose of this drive is to save an unnecessary amount of metal, I am against it.

Another Army purchase that ought to cause the average taxpayer to raise his eyebrows was that of over four and a half million web belts, three and one-half inches wide, and one belt is issued each year. Now I'd be the last guy in the world to leave the Army with its pants down, but since the Army will only issue a belt at a time and belts are interchangeable, it looks like three belts per man are unnecessary.

Another tricky piece of government equipment were the tensile scale of 500,000,000 lbs. of butter to Italy at 15 cents a pound by the U. S. Department of Agriculture (American taxpayers pay around 75 cents a pound). I am sure that the Quartermaster Corps bought 5,000,000 lbs. of oleomargarine at current market price. It looks like the Quartermaster's right to stock with the American taxpayer or somebody and find out what Uncle Sam has on his pantry shelf before doing any buying. As it stands now, the American fighting man eats about 15 cents a pound of butter while the Italians enjoy American butter at 15 cents a pound. And don't forget brother taxpayer, you and I paid for that butter that paid a helluva lot more than 15 cents a pound.

Right now we are hearing a lot about controls. God knows we have plenty of 'em now, but Mr. Truman wants a lot more. Remember, the more controls we have, the more bureaucratic, the more inspectors, the more directives and regulations. The whole thing gets louder and funnier and the cost in the end of the day is tremendous.

The little grocer or merchant is just as good an American and just as patriotic as any of the dim-witted pencil pushers who have had their laws passed. Who sits in Washington office buildings and operate the cumbersome control machine, but the average guy, trying to make an honest living, makes one long headache for the ordinary merchant or business man. He has to go to Harvard Law School and never learned to talk in circles or took a course in mind reading.

A guy who wrote it probably thinks it is as clear and understandable as two-and-a-half makes four. He is under the responsibility he carries in telling you how to run your business and thinks life would be a lot easier if you were a lot better at it. He is a dumb simple creature. But put that same guy to running a store or business and he would go broke in a week.

Here is an actual sample of a letter from a control regulation. How would you like to have doubletalk like this thrown at you every day or so by some brain-damaged official with instructions to comply with it or
